

I am an avid supporter of XM radio due to the fact that it is commercial free! I am tired of the "morning shows", unwarranted commercials, lame news, and talked over music. i chose XM because of the fact it is commercial free and is a great service for individuals like me. I also would like to express the fact that no one should have the right to monopolize what type of programming I elect to hear. Satellite radio is "the future" and it is at our fingertips now. The NAB will not lose anything so they should chose to drop this action. I am sure that the percentage of XM listeners is too low to even count in a statistic.

The NAB should not have the opportunity to monopolize on radio signals. They should clean up there own yard before leaving the scene to see what is going on on the other side of the fence.

I am appalled that someone would dictate to me what type programming i can only listen too when XM Satellite radio jsut lets me chose without any hassle. That is what radio should be about.

Thank you for the opportunity to voice my opinion. Please drop the NAB's case against Satellite Radio. Our country has more important issues than to pursue someone's greed.
